

I was hoping we could go for this type of layout [screenshot from <https://voicebot.ai/research/>]:

Voicebot Research

The Top 44 Leaders in Voice divided among four key categories.

[VIEW NOW](#)

Market data and analysis on how marketing professionals use and view voice apps.

[DOWNLOAD NOW](#)

[VOICE ASSISTANT](#)

[SMART SPEAKER CONSUMER ADOPTION](#)

I would create image/graphics for resource listing. In place of “Voicebot Research” headers would be the following three in bold:

- **OVN White Papers** - User will click to view/download PDF
- **OVN Research** - User will click to view/download PDF or link to separate page set up like a blog
- **Industry Resources** - User will click each link to be directed to a specific page on 3rd party site
